

ACEs Aware is here to help.

No matter where your clinic is on its ACE screening and response journey, ACEs Aware has resources available to help you.

Clinical Implementation Pilot Program

California Medi-Cal providers can apply for funding to overcome barriers to implementing and sustaining an ACE screening and response initiative in their clinic. *See reverse side for eligibility requirements.*

Implementation Resources

ACE Screening Implementation How-To Guide: we have an online course as well as a downloadable guide that provides clinical teams step-by-step guidance on how to introduce ACE screening and trauma-informed care into practice at the organizational level.

The ACEs Aware initiative offers Medi-Cal providers training, screening tools, clinical protocols, and payment for screening children and adults for Adverse Childhood Experiences (ACEs). Screening for ACEs, assessing for risk of toxic stress, and responding with evidence-based interventions can significantly improve the health and well-being of individuals and families.

Eligibility for ACEs Aware Clinical Implementation Pilot Program

To be eligible for funding, applicant organizations must meet the following requirements:

- Be a clinical service provider located in California.
- At least 25 percent of patient/client population of the clinic must be enrolled in Medi-Cal.
- Is early in their ACE screening and response journey.
- Organizations that receive an ACEs Aware Clinical Implementation Pilot Program award will commit to:
 - Ensuring all clinical staff complete the Becoming ACEs Aware in California core training and attest to completion (as appropriate).
 - Forming an ACE screening and response implementation team.
 - Attending three virtual meetings with the ACEs Aware technical assistance team (before, midway, and at the end of the grant period, which begins when the organization receives funds).
 - Launching an ACE screening and response pilot within three months of receiving the award.
 - Submitting a final report
